Licensed Trade Stocktaking Services

Stocktaking for the
Public House & Hospitality

Stocktaking you can really count on

Our extensive network of skilled professionals allows Stockcheck to offer industry designed systems and services to all sectors within the hospitality and leisure industries.

Maybe you're operating a short term tenancy with one of the UK's major Pub Co's or regional brewers, or you have an investment in a long term lease or freehold, either way, a professional stocktaking service is vital to the long-term success of your business.

All Stockcheck stocktakers are trained to the highest level, and of course fully understand the stock control procedures associated with these types of businesses.

Our professional stocktakers will highlight many of the following areas, of which all are necessary to achieve maximum profit potential for your business.

- Identifying actual stock performance against expected – theft or stock loss.
- Analysing your purchases – making sure you only pay for what you've agreed.
- Product by Product analysis – ensuring every product line performs to the maximum.
- Stockholding – identify if your cash is being held needlessly in a cellar instead of in your bank.
- Gross Profit Calculator – reports the average profit values you make each day.

By tracking these key elements needed to improve profitability, you can quickly take remedial action – prompt action saves money.

Not only do we utilise our own industry leading software to deliver these reports, but our stocktakers are both knowledgeable, and local. Their experience, and extensive reports, provides you with the information to gain the maximum from your business.

You may ask, "why not just wait for the Accountants annual Profit & Loss accounts"? That will be months after the end of your trading year. Stockcheck's service is generally a monthly service (maybe longer if only minor issues are identified) and in far greater detail to that of your Accountant, thereby addressing problems as they arise, not months later.

“Our service could make the difference between success and failure...”

Stephen Grantham - Stockcheck

Our Service Includes

Stockcheck

where national experience and local knowledge really count.

Comprehensive Food & Liquor reporting

On-site reports, available to you on the day of the stocktake*

Our comprehensive level of reporting is designed for all business types and needs. Printed and electronic copies are available.

Consultancy

Most importantly we'll discuss the report with you. Highlight our findings, and advise you what action you may need to take.

Business Certificates

Whether you're buying or selling we'll provide an accurate and independent valuation of the stock held. At your businesses year-end we'll provide you with a Valuation Certificate so your Accountant can produce your annual Profit & Loss Account.

Increased Profitability

We know from experience that our service improves not only the professional way you run the business, but also increases profitability.

*subject to information supplied

“ Stocktaking is such a vital element of your business success, we understand how important it is to provide you with the best possible service - Stockcheck fulfills that objective at every opportunity... ”

Mike Smith - Stockcheck
